

CommercePayments® Prepaid Expense Card, Transcript

When you're responsible for disbursing funds at your organization, you simply don't have time to deal with complicated processes. It's time to turn to a flexible, easy to use employee expense management alternative to simplify and empower the purchasing and per diem workflow for your organization.

The CommercePayments® prepaid expense card program from Commerce Bank allows organizations to replace their outdated fund distribution and reimbursement processes with a controllable and trackable solution, all without needing to open multiple lines of credit. Your organization will be able to easily load and unload funds whenever your team needs to make a purchase, plus your program administrator will have the power to set spending limits, turn access to cash on or off, and blacklist merchant codes, providing your organization with ultimate purchasing control through the mobile app.

Your team will know exactly how much is on their card at any given time and if their card is ever lost or stolen. Your program administrator can quickly disable the card to limit your organization's exposure to fraudulent payments. The Prepaid Expense Card Program is perfect for providing premium payments to offsite employees or student athletes or wherever organization needs to allot funds to employees for everyday purchases. Implementation is simple.

A Commerce Bank representative will train your program administrator how to order cards for your organization, load funds in a variety of methods, and run expenditure reports. It's time to get the purchasing control your organization deserves with the Commerce Bank Prepaid Expense Card Program. Speak with a Commerce Bank representative today to learn more.
